sriram8523@gmail.com

Chennai, Tamil Nadu

SUMMARY

Embedded & IoT project professional with 4+ years spanning firmware development and Industry 4.0 project delivery. Experienced in building firmware for industrial IoT devices (ESP32, STM32, Raspberry Pi) with protocols such as BLE, Modbus, MQTT and OPC UA, and in managing cross-functional automation projects end to end. Combines deep embedded expertise with project-management and business-analysis skills backed by an MBA in Business Analytics.

EXPERIENCE

Assistant Manager – Projects (Industry 4.0 / IoT)

Suja Shoei Industries Pvt. Ltd.

Nov 2024 – Present Chennai

- Lead Industry 4.0 and digital-transformation projects across manufacturing operations.
- Drive M2M data-collection and ERP-integration projects for real-time machine visibility.
- Evaluate and manage IoT, MES, OEE, robotic-automation and vision-inspection solutions.
- Prepare URS, feasibility studies and technical proposals; track scope, risks and milestones.
- Coordinate automation vendors, ERP partners, software teams and internal stakeholders.

Project Engineer – Firmware

Marlensoft Pvt. Ltd. (A unit of Kern & Sohn GmbH)

Feb 2022 – Mar 2024 Chennai

- Developed firmware for smart IoT devices for weighing scales and precision instruments.
- Acquired data from scales via RS232 / USB / Bluetooth Classic and streamed it to apps over BLE.
- Built medical-scale firmware consolidating scale + barcode + RTC data into JSON, posting to server and storing locally via SPIFFS.
- Implemented BLE-based device provisioning (Wi-Fi SSID/password, server config).
- Interfaced sensors over I2C, SPI and UART; root-caused defects and ensured compliance.

EDUCATION

MBA – Business Analytics

SASTRA Deemed University, Tanjore

2023 – 2025 CGPA 8.5

B.E. – Electronics & Communication Engineering

St. Joseph's Institute of Technology, Chennai

2017 – 2021 CGPA 7.42

KEY ACHIEVEMENTS

End-to-End IoT Firmware

Delivered production firmware for IoT weighing devices from prototype to deployment.

Global OEM Collaboration

Worked directly with Kern & Sohn (Germany) and international automation suppliers.

Industry 4.0 Project Delivery

Led M2M, ERP-integration and vision-inspection projects across the shop floor.

National Robotics Competitions

Participated in multiple state- and national-level robotics competitions.

SKILLS

Embedded Firmware

C / C++

ESP32 / STM32

Arduino / Raspberry Pi

RTOS

BLE

Modbus RTU/TCP

MQTT

OPC UA

I2C / SPI / UART

Node.js

IIoT / Industry 4.0

ERP / MES / OEE

Project Management

Requirement Gathering

TRAINING / COURSES

C & C++ Programming

Professional certification

Industrial IoT & Communication Protocols

MQTT, Modbus RTU/TCP, OPC UA, BLE
